Drive Envoy 4

The Envoy 4 is a robust and modern designed mobility scooter which is more than up to the job of taking on the requirements needed for a pavement scooter. Features included are often only seen on larger class 3 scooter but have been added to ensure extra safety and durability.

Comfort is offered via a couple of different items which all work together to ensure a smooth ride over uneven terrain such as the all-round suspension, pneumatics tyres and the padded seat. The driving position is enhanced via the delta style handle bars which makes sure the scooter is always under control. A LED light is fitted at the front to assure visibility at all times.

This mobility scooter is ideal for use to and from the local shop but best of all it is small enough that you may even drive it around filling the front basket with all you shopping safely in the front basket.

Specification

Length	121cm
