Pride Revo 2.0

The Revo 2.0 is the new designed version from Pride Mobility. This medium range portable boot scooter is fitted with 35amp batteries providing greater distance (more than any other portable scooter on the market) and it still has the ability to be easily disassembled for transportation.

This model has also had addition features which truly makes it stand out from the competition, features like Comfort-Trac front and rear suspension, large puncher proof tyres, delta style handle bars, front and rear LED lights and a tiller mounted USB charging socket. One addition features which is not seen on any other mobility scooter is that it has a tiller light under the controller head to help the user see objects or see within a handbag better

This scooter also comes with the options to charge the batteries on and off board, allowing you to keep the scooter in the car or garage and save space within your property.

Features

- Non marking puncher proof tyres
- Fitted with 35amp batteries
- Available in blue and grey
